** 25% discount applies to prepaid bookings of 3 sessions or more, or when included with a grooming package.

Protect your pet's dental health with a regularly scheduled oral hygiene routine. We use state-of-the-art oral hygiene technology which has no movement or vibration, offering a stress-free and pain-free experience for your pet.

Many dogs over the age of three suffer from periodontitis, the inflammation of the gums due to tartar build-up. Caring for your pet's gums is vital to preventing periodontitis and prolonging their health. This service cleans the upper and lower jaw area, killing bacteria and minimizing/eliminating the formation of tartar - and saving you hundreds on vet bills in the long run!

An Initial Assessment & Deep clean (30 mins) is the starting point for our teeth cleaning services. While closely inspecting your pet's teeth and gums, we take photos, record progress and compile a photographic PDF report, which is shared with you (digitally) after the appointment.

We then recommend maintenance appointments between 8 and 10 weeks to maintain good oral health.

Please contact claire@pawfolk.com or WhatsApp 07429613546 with any further queries.
